

Sub A1

Abstract
A mixture containing A) vinylcyclohexane
system containing lactone, sterically hin
process for the preparation and the use
articles, e.g., optical data stores.

[illegible]

VINLYCYCLOHEXANE-BASED POLYMER/COPOLYMER MIXTURE AND STABILIZER SYSTEM

ABSTRACT OF THE DISCLOSURE

A thermoplastic molding composition containing a (co)polymer of vinylcyclohexane and a stabilizer system is disclosed. The stabilizer system contains lactone, sterically hindered phenol and a phosphite compound. The composition that is characterized by its improved thermal stability is suitable for the preparation of molded articles, including optical data carriers.
